Controlled Systems Lab · Offline renderer

Saved stage projections

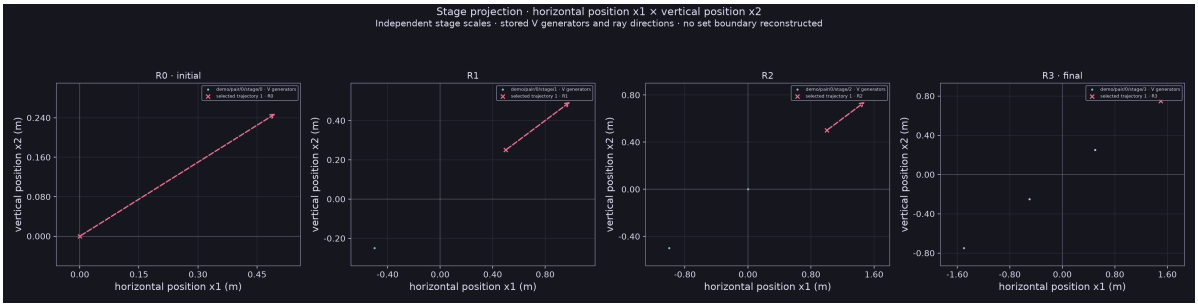

Validated batch `csl.stage-projection-batch/1`; route `demo.affine-box-reachability`; problem `planar-integrator-box-control-demo`.

Output directory: `this bundle directory`

Each panel is a saved stage outcome using independent scales. Stored V generators are shown as markers; no boundary is reconstructed. Trajectory overlays are selected histories, separate from reachable-set geometry and evidence.

Stage projection · horizontal position x1 × vertical position x2

Independent scales are used for each stage. R0 · initial: success / equivalent. relation equivalent; assurance numerical; provider csl.demo.affine-box-coordinate-selection version 1.0.0; source sets ['demo-state-set-R0']; evidence scopes set_relation. component demo/pair/0/stage/0: point, 1 stored V generators, 0 rays. selected trajectory 1 at R0 · initial; evidence: illustrative fixed control u=0.5 at every stage; not optimized; separate from set geometry; R1: success / equivalent. relation equivalent; assurance numerical; provider csl.demo.affine-box-coordinate-selection version 1.0.0; source sets ['demo-state-set-R1']; evidence scopes set_relation. component demo/pair/0/stage/1: segment, 2 stored V generators, 0 rays. selected trajectory 1 at R1; evidence: illustrative fixed control u=0.5 at every stage; not optimized; separate from set geometry; R2: success / equivalent. relation equivalent; assurance numerical; provider csl.demo.affine-box-coordinate-selection version 1.0.0; source sets ['demo-state-set-R2']; evidence scopes set_relation. component demo/pair/0/stage/2: segment, 4 stored V generators, 0 rays. selected trajectory 1 at R2; evidence: illustrative fixed control u=0.5 at every stage; not optimized; separate from set geometry; R3 · final: success / equivalent. relation equivalent; assurance numerical; provider csl.demo.affine-box-coordinate-selection version 1.0.0; source sets ['demo-state-set-R3']; evidence scopes set_relation. component demo/pair/0/stage/3: segment, 8 stored V generators, 0 rays. selected trajectory 1 at R3 · final; evidence: illustrative fixed control u=0.5 at every stage; not optimized; separate from set geometry. The figure plots saved V generators and ray directions. It does not reconstruct set boundaries or perform geometry conversion.
